

Kursanalys för Kompletterande utbildning för tandläkare på KI

Kurskod 7KTO15	Kursnamn Vetenskapligt arbete 1	Högskolepoäng 2,5 hp
Termin (vt/ht-år) 2025	Tidsperiod för kursens genomförande Klicka här för att ange text	
Kursansvarig institution (om annan än Institutionen för odontologi) Institutionen för odontologi		
Kursansvarig lärare Abhishek Kumar	Examinator (om annan än kursansvarig) Abhishek Kumar och Joannis Grigoriadis	
Ev. momentansvariga lärare Abhishek Kumar	Svarsfrekvens obligatorisk kursvärdering 66.6%	
Antal registrerade studenter 15	Andel godkända studenter vid kursens slutdatum 100%	
Metoder för studentinflytande (utöver avslutande obligatorisk kursvärdering) Communication during the seminars, lectures and email correspondence		

1. Genomförda förändringar/uppföljning av aktivitetsplan från föregående kurstillfälle

The course was adopted from the previous course, and no significant changes were made except for the language requirements. The written report and opposition are conducted in English (with exceptions). During the oral presentation, questions are asked in English. Answers in either English or Swedish are accepted same as the previous courses.

Aktivitet	Ansvarig	Tidsplan	Status
1 Most lectures/seminars have been at KI. In exceptional cases, one lecture was held digitally due to logistical reasons raised by the students.	Abhishek Kumar

-NA-
- *Interprofessionellt lärande*
-NA-
- *Etik/lika villkor*
-NA-
- *Professionellt förhållningssätt och livslångt lärande*
-NA-

2. Kursens genomförande och resultat

Kortfattad sammanfattning av studenternas svar i kursvärderingen/-enkäten

The course evaluation was completed by 10 out of 15 students, resulting in a response rate of 66.7%. Overall, the results show a positive experience among participating students.

All respondents agreed that the course offered strong opportunities for active learning, with 70% fully agreeing and the remaining 30% agreeing to a high extent. Activities such as discussions, group work, seminars, and peer learning were highlighted as effective components supporting student engagement. The students also expressed that the learning environment was inclusive and respectful. Every respondent felt comfortable collaborating, speaking in front of the group, and interacting with teachers, with 80% fully agreeing. This indicates that the course successfully encouraged a safe and supportive atmosphere. Regarding the course's overall quality, 100% of the students rated the course positively, and 80% fully agreed that the course as a whole was good. No concrete suggestions for improvement were provided; instead, one student explicitly noted that the course was valuable, especially for those without prior experience working with scientific articles. In summary, the evaluation reflects that the course was well-structured, pedagogically supportive, and highly appreciated. Students felt included, engaged, and reported that the course significantly contributed to their learning and development.

Kursansvarigs egna reflektioner om styrkor och svagheter

The student representative raised concerns about the limited clinical time and the demanding nature of the theoretical course. In response, we are considering adjustments to reduce the oral examination in the first part of the course. Moving forward, students may only be required to submit their research proposal during Vetenskapligt arbete 1, while the complete thesis and presentation will be conducted exclusively during Vetenskapligt arbete 2.

3. Förslag till förbättringsarbete och kursutveckling
