

Course analysis (course evaluation)

Course code 3BL010	Course title Komplex vävnadsanalys med multifärgningstekniker och bildanalys	Credits 7.5
Semester (VT/HT-yr) VT-24	Dates 21 March – 31 May 2024	

Course Director Malgorzata Parniewska	Examiner Pernilla Lång
Teachers in charge of different parts of the course Malgorzata Parniewska	Other participating teachers Pernilla Lång, Carlos Fernandez Moro, Wenyang Shi, Justin Slager

Number of registered students at the 3-week check 13	Number passed at final course day 9	Response frequency course valuation survey 53.85%
Other methods for student influence (in addition to the final course evaluation/survey) Q and A sessions, Canvas messages		
Feedback reporting of the course evaluation results to the students 12 June 2024		

Note that...

The analysis should (together with a summarising quantitative summary of the students' course evaluation) be communicated to the education committee at the department responsible for the course and for programme courses also to the programme coordinating committee.

The analysis was communicated to the education committee on the following date: 2024-09-03
The analysis was communicated to the programme coordinating committee on the following date: 2024-09-03.

1. Description of any changes implemented since the previous course occasion based on the views of former students

Does not apply since course took place for the first time.

2. Brief summary of the students' evaluation of the course

(Based on the students' quantitative responses to the course valuation and key views from free text responses. Quantitative summary and any graphs are attached.)

The survey indicates that the students were very satisfied with the course. They think that they developed valuable expertise and skills and that they reached the intended learning outcomes. They clearly see a red thread throughout the course. Students think that the teachers were open to their ideas and opinions to a great extent. The students enjoyed the course structure, content, project work and TBL sessions. They found the content interesting. Many students think that group work was not successful.

**Karolinska
Institutet**

3. The Course Director's reflections on the implementation and results of the course

Strengths of the course:

The course had a good structure with well-prepared content and well-connected modules with a clear red thread. Each module allowed for acquiring theoretical knowledge and afterwards testing the knowledge with a practical project work. The TBL sessions were good in summarising knowledge as well as allowing for in person discussions. The exam was an open format discussion allowing for further learning.

Weaknesses of the course:

The group work was in many cases unsuccessful because of unequal contribution of group members.

3. Other views

Students need fixed times for making up for failed project work.

4. Course Director's conclusions and any suggestions for changes

(If changes are suggested, state who is responsible for implementing them and provide a schedule.)

We will re-visit the idea of group work. We may introduce a mix of individual work and group work.
