

IN CASE OF AN INJURY

Management of needlestick and similiar injuries

THE STUDENT

Should immediately:

- Wash and disinfect according to protocol

Thereafter:

- Contact your supervisor.
- Contact Student Wellbeing Centre +46(O)8-524 835 70
- Submit completed needlestick injury report (stick-/skärskadejournal) to Student Wellbeing Centre.
- KI-student – report the injury in the KI incident reporting system
Student at another higher education institution– contact your programme coordinator.

THE SUPERVISOR/TEACHING STAFF

- Initiates risk assessment with support of attending physician in the clinic.
- Ensures that Student Wellbeing Centre receives de-identified test results on source patient* (via needlestick injury report).

**Source patient (index patient): current individual who may be the source of infection*

NO-RISK PATIENT

SOURCE PATIENT

AT-RISK PATIENT

Refer student to Student Wellbeing Centre:
Phone: +46(O)8-524 835 70

Responsible physician:
Blood-bourne virus (BBV) testing of source patient:

- Request informed consent from the patient.
- Hepatitis serology (B+C) and HIV-serology.
- Notifies the test result to the supervisor and/or Student Wellbeing Centre.
